

GuardCap Emerging Markets Equity Fund

Class: I (acc) EUR

Investment Objective

The investment objective of the Fund is to deliver a superior return to the MSCI Emerging Markets Index over the long-term by investing primarily in equity and similar securities issued by companies that have significant exposure to emerging market economies.

Investment Approach

Philosophy: growth drives returns; quality protects against downside; valuation matters.

- Concentrated, long-only strategy with 25-30 high quality, sustainably growing companies
- In-depth fundamental analysis, bottom-up analysis of selected high-confidence stocks
- Benchmark agnostic, unconstrained portfolio construction; high active share
- Genuine long-term investing with low portfolio turnover
- Large / Mid-cap focus

Manager Commentary

The MSCI Emerging Markets Index returned +1.9% in December, taking total returns for the benchmark to -2.5% for 2021. Since the Index peaked in February 2021, it has declined by approximately 13% but is 69% above the pandemic-related low that it reached in March 2020. Latin America was the best performing region for the month (+5.9%) but the worst for the calendar year (-8.1%). The best performing region in 2021 was commodity-heavy EMEA, which returned +18.0% including +2.3% for December. Emerging Asia, the biggest region in the index, returned +1.5% for the month and -5.1% for the year. The largest constituent country in Emerging Asia is China, which was also the biggest detractor, returning -21.8% in 2021.

The top 3 performing sectors in December were utilities (+6.6%), IT (+6.3%) and energy (+4.3%). The bottom 3 sectors were healthcare (-6.0%), consumer discretionary (-4.6%) and real estate (-1.4%). A similar pattern applied for 2021 as a whole, with the top 3 sectors being energy (+20.9%), utilities (+12.4%) and IT (+9.9%) and the bottom 3 sectors being consumer discretionary (-29.1%), real estate (-21.8%) and healthcare (-19.8%).

Latin American e-commerce operator **MercadoLibre** was the largest contributor to performance in December, as its share price recovered somewhat from the previous month's weakness. Other contributors included consumer electronics giant **Samsung Electronics** and digital consultancy **EPAM**, whose share price benefited from peer company Accenture reporting strong quarterly results. Detractors from performance included Chinese e-commerce operator **JD.com**, after Tencent announced that it would be reducing its stake in the company, Southeast Asian e-commerce group **Sea Ltd**, whose share price has de-rated from its recent peak in October and digital services group **Alibaba**, following a challenging year and a low-key Investor Day.

Fund ESG Ratings

Morningstar Sustainability Rating™	
Morningstar Low Carbon Designation™	

ESG Integration

All companies under consideration are assessed against the team's ten Investment Criteria, including strong "Foundations for Sustainable Growth" (FSG), which ensures that a company's ESG practices align with its potential for long-term sustainable growth. The Fund's concentrated approach (25-30 stocks) enables a thorough understanding of the sustainability risks and opportunities relevant to each company and an analysis of a company's ESG issues forms a key part of every investment decision.

Voting and Engagement

Active ownership is deeply embedded in our investment philosophy and where practical we vote on every resolution and corporate action proposed by our companies. If a company is engaged in a practice that concerns us, we will engage with the company on the issue, seek to learn more about it and encourage positive change.

ESG Exclusions

The Fund excludes direct investment in corporate issuers that are involved in the manufacture or production¹ of:

 Controversial weapons ²	 Extraction of fossil fuels and/or generation of power from them
 Firearms or small arms ammunition	 Tobacco products

¹Subject to a specific revenue threshold of 5%, based on a company's annual report

²Includes anti-personnel landmines, cluster munitions, biological weapons and chemical weapons

Carbon Intensity

	Fund	Benchmark
Carbon to Revenue (C/R)	73.84	513.44
Carbon to Value Invested (C/V)	19.25	288.43
Weighted Average Carbon Intensity (WACI)	77.43	373.65

Source: Trucost; as at 31 December 2021. Carbon Intensity calculated in TCO2E/USD M. Includes Scope 1 and Scope 2 emissions.

The Carbon to Revenue (C/R) metric shows the intensity of the portfolio and benchmark using the absolute apportioned carbon emissions and apportioned revenues, calculated on an ownership basis (value of holdings divided by chosen apportioning metric), as at the analysis date. The Carbon to Value (C/V) Invested metric takes the carbon emissions (apportioned using either market capitalisation or enterprise value) divided by the value of holdings in a portfolio or benchmark. The Weighted Average Carbon Intensity (WACI) metric takes the carbon intensity (total carbon emissions divided by total revenue) of each holding and multiplies it by its investment weight (the current value of the holding relative to the current value of the whole portfolio).

Carbon Apportioned by Scope

	Fund	Benchmark
Scope 1	192.07	12,488.72
Scope 2	833.16	2,561.57

Source: Trucost, as at 31 December 2021. Calculated in TCO2E. Greenhouse Gas (GHG) Protocol methodology.

This represents the absolute quantity of portfolio or benchmark emissions attributed from their underlying constituents on an ownership basis, as at the analysis date, based on the defined GHG methodology. Absolute carbon emissions are apportioned from a company to a portfolio based on equity ownership (market capitalisation) or share of financing (enterprise value). Scope 1 emissions are from directly emitting sources that are owned or controlled by a company. Scope 2 emissions are from the consumption of purchased electricity, steam, or other sources of energy generated upstream from a company's direct operations. Reference: GHG Protocol.
