

GuardCap Emerging Markets Equity Fund

Class: I (acc) USD

Investment Objective

The investment objective of the Fund is to deliver a superior return to the MSCI Emerging Markets Index over the long-term by investing primarily in equity and similar securities issued by companies that have significant exposure to emerging market economies.

Investment Approach

Philosophy: growth drives returns; quality protects against downside; valuation matters.

- Concentrated, long-only strategy with 25-30 high quality, sustainably growing companies
- In-depth fundamental analysis, bottom-up analysis of selected high-confidence stocks
- Benchmark agnostic, unconstrained portfolio construction; high active share
- Genuine long-term investing with low portfolio turnover
- Large / Mid-cap focus

Manager Commentary

The MSCI Emerging Markets Index returned -1.9% in January. Continuing the trend that was seen in December, Latin America was again the best performing region for the month (+7.4%) and returns in commodity-heavy EMEA were also positive (+2.6%). Emerging Asia (-3.5%) was the clear regional laggard. Only three sectors delivered positive performance in January: real estate (+5.8%), financials (+5.3%) and energy (+2.3%). The worst performing sectors were healthcare (-12.5%), IT (-5.7%) and consumer discretionary (-5.2%).

Brazilian car rental operator **Localiza** was the largest contributor to performance. Investor sentiment towards Brazil improved during the month and Localiza recently received the green light from antitrust authorities for the proposed acquisition of a major competitor. Digital giant **Tencent** had a positive month ahead of the Chinese New Year holiday. Singaporean bank **OCBC** also contributed positively to returns, its share price benefiting from a general upward adjustment in global interest rate expectations. Detractors from performance included digital consultancy **EPAM** and e-commerce operators **MercadoLibre** and **Sea Ltd**, all three of whom were impacted by a market-wide contraction in valuations for higher growth companies.

ESG Integration

All companies under consideration are assessed against the team's ten Investment Criteria, including strong "Foundations for Sustainable Growth" (FSG), which ensures that a company's ESG practices align with its potential for long-term sustainable growth. The Fund's concentrated approach (25-30 stocks) enables a thorough understanding of the sustainability risks and opportunities relevant to each company and an analysis of a company's ESG issues forms a key part of every investment decision.

Active Ownership

Active ownership is deeply embedded in our investment philosophy and where practical we vote on every resolution and corporate action proposed by our companies. If a company is engaged in a practice that concerns us, we will engage with the company on the issue, seek to learn more about it and encourage positive change.

Exclusion Policy

The Fund excludes direct investment in corporate issuers that are involved in the manufacture or production¹ of:

Controversial weapons²

Extraction of fossil fuels and/or generation of power from them

Firearms or small arms ammunition

Tobacco products

¹Subject to a specific revenue threshold of 5%, based on a company's annual report

²Includes anti-personnel landmines, cluster munitions, biological weapons and chemical weapons

Carbon Intensity

	Fund	Benchmark
Carbon to Revenue (C/R)	73.84	513.44
Carbon to Value Invested (C/V)	19.25	288.43
Weighted Average Carbon Intensity (WACI)	77.43	373.65

Source: S&P Trucost Limited © Trucost 2022; as at 31 December 2021. Carbon Intensity calculated in TCO2E/USD M. The lower the score the lower the intensity. Includes Scope 1 and Scope 2 emissions.

The Carbon to Revenue (C/R) metric shows the intensity of the portfolio and benchmark using the absolute apportioned carbon emissions and apportioned revenues, calculated on an ownership basis (value of holdings divided by chosen apportioning metric), as at the analysis date. The Carbon to Value (C/V) Invested metric takes the carbon emissions (apportioned using either market capitalisation or enterprise value) divided by the value of holdings in a portfolio or benchmark. The Weighted Average Carbon Intensity (WACI) metric takes the carbon intensity (total carbon emissions divided by total revenue) of each holding and multiplies it by its investment weight (the current value of the holding relative to the current value of the whole portfolio).

Carbon Apportioned by Scope

	Fund	Benchmark
Scope 1	192	12,489
Scope 2	833	2,562

Source: S&P Trucost Limited © Trucost 2022, as at 31 December 2021. Calculated in TCO2E. The lower the score the lower the emissions. Greenhouse Gas (GHG) Protocol methodology.

This represents the absolute quantity of portfolio or benchmark emissions attributed from their underlying constituents on an ownership basis, as at the analysis date, based on the defined GHG methodology. Absolute carbon emissions are apportioned from a company to a portfolio based on equity ownership (market capitalisation) or share of financing (enterprise value). Scope 1 emissions are from directly emitting sources that are owned or controlled by a company. Scope 2 emissions are from the consumption of purchased electricity, steam, or other sources of energy generated upstream from a company's direct operations. Reference: GHG Protocol.

Overall Morningstar Rating™ is an assessment of a fund's past performance, based on both return and risk and shows how similar investments compare with their competitors. The Morningstar Sustainability Rating™ is a measure of how well the portfolio holdings are managing their ESG Risk relative to the portfolio's Global Category peer group. Sustainalytics provides company-level analysis used in the calculation of Morningstar's Historical Sustainability Score. The Morningstar Low Carbon Designation™ is Sustainalytics' evaluation of the degree to which a firm's activities and products are aligned with the transition to a low-carbon economy. Investment decisions should not be based on a high rating alone. All data is as at the document date unless indicated otherwise. © 2021 Morningstar, Inc. All rights reserved.
