

GuardCap Global Equity Fund

Class: I (acc) EUR

Morningstar Analyst Rating™

Morningstar Sustainability Rating™

Investment Objective

The investment objective of the Fund is to seek long-term growth of capital with lower than market volatility by investing primarily in equity and similar securities issued by high quality companies listed on recognised markets in countries, which are members of the Organisation for Economic Co-operation and Development ("OECD").

Investment Approach

Philosophy: growth drives returns; quality protects against downside; valuation matters.

- Concentrated, long-only strategy with 20-25 high quality, sustainably growing companies
- Focused "total immersion", bottom-up analysis of selected high-confidence stocks
- Benchmark agnostic, unconstrained portfolio construction; high active share
- Genuine long-term investing with low portfolio turnover
- Large / Mid-cap focus

Manager Commentary

The top contributors to performance year to date were **Mastercard**, **Booking Holdings** and **CME**.

Mastercard reported stronger than expected Q4 earnings as consumer spending trends continued to improve. Net revenue increased 28% with cross-border spending exceeding pre-pandemic levels. The shift from cash and cheques to electronic payments by consumers and businesses is expected to continue to drive growth. **Booking Holdings'** share price rebounded in January after fears around the Omicron variant sparked a sell off in December. With its broad inventory of bookable rooms and easy to use technology, Booking should benefit from a rebound in global travel as well as the ongoing trend towards online booking and consolidation of a highly fragmented travel agency market. **CME** benefitted from increased volatility in the derivatives markets in January. Average daily volumes increased 28% with a very strong performance in its equities and interest rates product lines. The end of the pandemic should bring a reduction in Central Bank intervention, higher interest rates and continued risk management activity using derivatives.

The top detractors year to date were **EssilorLuxottica**, **MarketAxess** and **Novo Nordisk**.

EssilorLuxottica is the global leader in the design, manufacture and distribution of ophthalmic lenses, frames and sunglasses. It saw its share price decline after a very strong performance in 2021. Ageing demographics, premiumisation, youth lifestyles and multi-pair are strong long-term drivers of growth. Electronic bond trading platform **MarketAxess** continued to feel the impact of muted trading conditions after posting very strong volumes during the peak of the pandemic. Electronic bond trading is currently only about 20% penetrated but this is expected to grow as market participants increasingly look for better liquidity, price transparency and best execution. **Novo Nordisk** is a leader in the global diabetes market with about 30% value share. Its share price fell in January due to concerns around supply constraints and emerging competition for its GLP-1 franchise. Approximately 537 million adults globally suffer from diabetes and of these only about a quarter currently have access to care.

ESG Integration

All investee companies must meet the team's ten Confidence Criteria, including strong "Foundations for Sustainable Growth" (FSG), which ensures that a company's ESG practices align with its potential for long-term sustainable growth. The Fund's concentrated approach (20-25 stocks) enables a thorough understanding of the sustainability risks and opportunities relevant to each company and an analysis of a company's ESG issues forms a key part of every investment decision.

Active Ownership

Active ownership is deeply embedded in our investment philosophy and we vote on every resolution and corporate action proposed by our companies. If a company is engaged in a practice that concerns us, we will engage with the company on the issue, seek to learn more about it and encourage positive change.

Exclusion Policy

The Fund excludes direct investment in corporate issuers that are involved in the manufacture or production¹ of:

Controversial weapons²

Extraction of fossil fuels and/or generation of power from them

Firearms or small arms ammunition

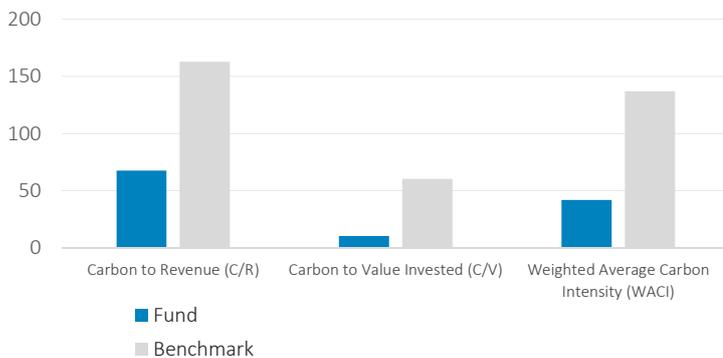

Tobacco products

¹Subject to a specific revenue threshold of 5%, based on a company's annual report

²Includes anti-personnel landmines, cluster munitions, biological weapons and chemical weapons

Carbon Intensity

	Fund	Benchmark
Carbon to Revenue (C/R)	67.67	162.75
Carbon to Value Invested (C/V)	10.53	60.37
Weighted Average Carbon Intensity (WACI)	41.94	136.89

Source: S&P Trucost Limited © Trucost 2022; as at 31 December 2021. Carbon Intensity calculated in TCO2E/USD M. The lower the score the lower the intensity. Includes Scope 1 and Scope 2 emissions.

The Carbon to Revenue (C/R) metric shows the intensity of the portfolio and benchmark using the absolute apportioned carbon emissions and apportioned revenues, calculated on an ownership basis (value of holdings divided by chosen apportioning metric), as at the analysis date. The Carbon to Value (C/V) Invested metric takes the carbon emissions (apportioned using either market capitalisation or enterprise value) divided by the value of holdings in a portfolio or benchmark. The Weighted Average Carbon Intensity (WACI) metric takes the carbon intensity (total carbon emissions divided by total revenue) of each holding and multiplies it by its investment weight (the current value of the holding relative to the current value of the whole portfolio).

Carbon Apportioned by Scope

	Fund	Benchmark
Scope 1	3,325	151,314
Scope 2	29,431	35,062

Source: S&P Trucost Limited © Trucost 2022, as at 31 December 2021. Calculated in TCO2E. The lower the score the lower the emissions. Greenhouse Gas (GHG) Protocol methodology.

This represents the absolute quantity of portfolio or benchmark emissions attributed from their underlying constituents on an ownership basis, as at the analysis date, based on the defined GHG methodology. Absolute carbon emissions are apportioned from a company to a portfolio based on equity ownership (market capitalisation) or share of financing (enterprise value). Scope 1 emissions are from directly emitting sources that are owned or controlled by a company. Scope 2 emissions are from the consumption of purchased electricity, steam, or other sources of energy generated upstream from a company's direct operations. Reference: GHG Protocol.

*Morningstar Analyst Rating™ is Morningstar's forward looking fund rating. Overall Morningstar Rating™ is an assessment of a fund's past performance, based on both return and risk and shows how similar investments compare with their competitors. The Morningstar Sustainability Rating™ is a measure of how well the portfolio holdings are managing their ESG Risk relative to the portfolio's Global Category peer group. Sustainalytics provides company-level analysis used in the calculation of Morningstar's Historical Sustainability Score. The Morningstar Low Carbon Designation™ is Sustainalytics' evaluation of the degree to which a firm's activities and products are aligned with the transition to a low-carbon economy. Investment decisions should not be based on a high rating alone. All data is as at the document date unless indicated otherwise. © 2021 Morningstar, Inc. All rights reserved.
