

GuardCap Global Equity Fund

Class: S (acc) EUR

Investment Objective

The investment objective of the Fund is to seek long-term growth of capital with lower than market volatility by investing primarily in equity and similar securities issued by high quality companies listed on recognised markets in countries, which are members of the Organisation for Economic Co-operation and Development ("OECD").

Investment Approach

Philosophy: growth drives returns; quality protects against downside; valuation matters.

- Concentrated, long-only strategy with 20-25 high quality, sustainably growing companies
- Focused "total immersion", bottom-up analysis of selected high-confidence stocks
- Benchmark agnostic, unconstrained portfolio construction; high active share
- Genuine long-term investing with low portfolio turnover
- Large / Mid-cap focus

Manager Commentary

The top contributors to performance year to date were **Alphabet**, **Novo Nordisk** and **EssilorLuxottica**.

Alphabet reported very strong Q3 results with organic revenue up 40% y/y driven by continued broad-based strength in advertising spend and high consumer online activity. Impressive 800bps improvement in operating margins. Over the past few years, the addressable market has expanded from the digitisation of traditional advertising to include broader marketing and product placement budgets as well as the cloud opportunity. **Novo Nordisk**, the leader in global diabetes and obesity, has seen strong performance year to date, raising guidance twice. The diabetes franchise is gaining market share and its new obesity drug Wegovy had a very successful US launch. Large unmet need, with over 450 million diabetics worldwide, of which only 50% are diagnosed, 25% receive care and only 6% achieve glycemic control, and 650 million people living with obesity. **EssilorLuxottica**, the global leader in the design, manufacture and distribution of ophthalmic lenses, frames and sunglasses, reported stronger than expected Q3 sales and upgraded its annual guidance. Pent-up demand has resulted in a strong bounce back in revenue growth as lockdown restrictions have eased. The recently closed acquisition of GrandVision provides an opportunity to deploy an omni-channel approach globally.

The top detractors year to date were **MarketAxess**, **Fanuc** and **Colgate**.

As a pioneer of bond market electronication, **MarketAxess** is strongly positioned to benefit from increasing penetration of electronic bond trading. Lower interest rate volatility in 2021 has temporarily put pressure on its volumes, revenues and market share and the stock has underperformed following a very strong performance in 2020. **Fanuc** is a Japanese provider of automation products and services. Global shortages of semiconductors, machinery and raw materials led to weaker than expected Q2 results. Guidance for the year was reduced in anticipation of further component shortages and cost inflation, but underlying demand remains strong. **Colgate**, a global leader in the oral care market, faces near-term pressure to gross margins from higher commodity and logistics cost. Long-term the company remains well positioned with strong brands and a robust innovation pipeline.
